

IN THE NEWS - GATOR CHUCKS

Global Tooling Offers Two-Year Warranty on GATOR Forged Steel Body Scroll Chucks featured in Manufacturing News, April 2011.

Global Tooling Solutions now offers a two-year warranty on all Gator Forged Steel Body Scroll Chucks. This warranty covers the Gator Adjustable, Precision and Large Thru-Hole Chuck Series.

“Moving to a two-year warranty for these groups makes perfect sense and it shows the confidence that we have in the Gator line. All Gator chucks are produced to a DIN/ANSI standard and we start the manufacturing process right by using the highest quality certified forgings,” said Karl Ganshirt, Global Tooling Solutions President. “There is a cost associated with this approach but this is a vital step in the production of a high

long life,” said a company spokesperson. “The quality of the raw material also supports high gripping power, accuracy, repeatability and the ability to run these chucks at higher speeds. The accuracy of all gator chucks significantly exceeds DIN run out requirements. All mounting dimensions meet DIN and ANSI standard requirements. Plain back chucks can be mounted with all adapters (A, D, C, L & Threaded) meeting DIN6350 requirements.

“...we are focused on quality first,”

quality manual lathe chuck and we are focused on quality first,” said Andrew Latawiec, VP of Product Development.

“Gator Chucks are produced with a high quality certified forged steel for high rigidity and

“Our forged steel body chucks are dedicated to finishing, medium duty and heavy duty machining applications. This group includes high precision 3 & 6-jaw adjustable scroll chucks with the diameters from 4 inches thru 25 inches, Precision 3 & 4-jaw scroll chucks with diameters from 3 inches thru 50 inches and Precision Large Thru Hole scroll chucks with diameters from 16 inches thru 26 inches. All Gator steel body chucks are available with the most popular spindle mounts and are stocked in our U.S. warehouse.”
